

Reiterating its commitment to transform the way education is delivered in the country, the Shiv Nadar University sponsors the third edition of the “Invite All Young Minds” summer internship program with the Mathematical Science Foundation (www.mathscifound.org), to give an opportunity to 60 bright minds (Class X and above, as well as College) from around the country to engage in path-breaking real world projects that have been a subject of vigorous research in the recent years.

The 4 week camp, (<http://www.mathscifound.org/activities/iaym11/>) from June 6 to 28 June, aims to nurture out of the box thinking by involving students in innovative projects that encourage experiments via computer simulation and physical models.
